

2015 BCSE BOARD OFFICERS

Johnson Controls, Chair
Mark Wagner, Vice President
Government Relations

American Wind Energy Association, Vice-Chair
Robert Gramlich, Senior Vice President,
Public Policy

**Polyisocyanurate Insulation
Manufacturers Association**, Vice-Chair
Jared Blum, President

Sempra Energy, Vice-Chair
Scott Crider, Vice President,
Federal Government Affairs

First Solar, Secretary
Kathy Weiss, Vice President,
Government Relations

Global Policy Associates, Treasurer
James Wolf, President

Power Anywhere, General Counsel
David Muchow, President & CEO

Business Council for Sustainable Energy, President
Lisa Jacobson

2015 BCSE BOARD MEMBERS

Alliance to Save Energy
Kateri Callahan, President

American Gas Association
Dave McCurdy, President & CEO

Austin Energy
Patricia Tierney Alofsin, Director,
Government Relations

Ingersoll Rand
Scott Tew, Executive Director, Center for
Energy Efficiency & Sustainability

Jupiter Oxygen Corporation
Thomas Weber, President

Kingspan Insulated Metal Panels
Paul Bertram, Director,
Environment and Sustainability

National Grid
Rob Mosher, Director,
Federal Government Relations

National Hydropower Association
Linda Church-Ciocci, Executive Director

**North American Insulation
Manufacturers Association**
Curt Rich, President & CEO

Qualcomm
Steve Crout, Vice President,
Government Affairs

Sacramento Municipal Utility District
Arlen Orchard, General Manager & CEO

Solar Energy Industries Association
Rhone Resch, President & CEO

Solar Turbines
Joseph Allen, Director,
Government Relations

The Stella Group, Ltd.
Scott Sklar, President

United Technologies Corporation
Peter Holland, Vice President, Commercial
and State Government Relations

Worldwatch Institute
Christopher Flavin, President Emeritus

The Business Council for Sustainable Energy (BCSE) is a coalition of companies and trade associations from the energy efficiency, natural gas and renewable energy sectors.

The BCSE advocates for policies at the state, national and international levels that increase the use of commercially available clean energy technologies and create a more secure, sustainable and diversified energy portfolio.

The industry vision that established the BCSE in 1992 continues today, as the Council's industries work together to meet U.S. energy needs and power the American economy.

The Council works to:

- Enact policies that accelerate the deployment of energy efficiency, renewable energy and natural gas
- Implement cost-effective programs and policies that recognize the environmental attributes of energy sources
- Increase the energy productivity of the economy and improve energy security
- Encourage market-based initiatives for energy and environmental policies

Sustainable Energy in America Factbook

A revolution is transforming how Americans produce, consume and even think about energy. The BCSE and Bloomberg New Energy Finance created the *Sustainable Energy in America Factbook* to arm policymakers, journalists and industry professionals with up-to-date, accurate market information. The report looks at clean energy broadly defined. The *Factbook* takes the pulse of the wide range of clean energy industries represented by the Council, including natural gas, renewable energy, distributed power and energy efficiency.

Key findings from the *Factbook* include:

- Natural gas and renewable energy generated more than 40% of U.S. electricity in 2014 and are the source of 93% of new power capacity built in the country since 2000.
- The energy productivity of the U.S. economy increased 11% from 2007 to 2014, as GDP grew 8% and total energy use fell 2.4%.
- Total U.S. investment in clean energy topped \$51.8 billion in 2014, the second highest level in the world.
