BCSE Statement on Passage of House Infrastructure Bill, H.R. 2

“The BCSE is pleased to see strong clean energy provisions incorporated into the House-passed INVEST in America Act, such as clean transportation, energy, and tax measures. It is our hope that these measures can be paired with the many bipartisan clean energy bills in the Senate, such as the American Energy Innovation and Leadership Act and the America’s Transportation Infrastructure Act, so the U.S. can accelerate investment in clean energy infrastructure, help the economy recover, assist the domestic manufacturing sector, and maintain America’s international competitiveness.

“BCSE appreciates the serious consideration Congress is providing to modernizing and expanding U.S. infrastructure. This objective is of prime importance to clean energy sectors. The federal government plays a unique role in that it can enable policies that will incentivize and leverage private sector participation and capital that will spur even greater improvement of our nation’s infrastructure.”

###

BCSE is a coalition of companies and trade associations from the energy efficiency, natural gas and renewable energy sectors, and also includes investor-owned utilities, public power, independent power producers, project developers, equipment manufacturers, and environmental and energy market service providers. Established in 1992, the Council advocates for policies that expand the use of commercially-available clean energy technologies, products and services. For more information on the Council, please visit: www.bcse.org and download the Sustainable Energy in America Factbook for the latest industry information.
